Club Opening Update

All is going well with meeting the requirements to keep you and our team safe for your return to exercising at the club. Protective screens are being erected, sanitising stations set up, exercise machines have been moved to safe distancing and one-way systems are in place. Deep cleaning is taking place, painting and decorating, installation of another sink on the ground floor and the marking out of your own personal spaces in the class studio are all in progress.

It is hugely disappointing that gyms and swimming pools have not been allowed to open at the same time as pubs and restaurants. In the middle of an obesity and mental health crisis encouraging us to eat and drink rather than exercising more to improve our health seems to be an odd choice by the government. However, the fitness industry is heavily lobbying the government about this and we are expecting good news soon, there is talk of a possibility of reopening in the middle of July from the business secretary today.

We have extended all membership freezes until 31st August or until we re-open.

See you soon, stay well 🥰
